Quiz instructions

Description

This Quiz is composed of 27 questions regarding lectures and tutorials, you will have 45 minutes to complete the quiz.

The quiz is worth 10% of the overall marks for IoT Programming.

This assessment task contributes to your overall percentage for this unit.

Instructions

During the test:

- You must be attending your tutorial session.
- Strictly NO communication with other students.
- Strictly no help from any webpage.
- If you have a question, raise your hand

Question 23	0.75 pts

What does the following code do?

```
from flask import Flask

app = Flask(__name__)

@app.route('/')

def index():

    return 'hello world'

if __name__ == '__main__':

    app.run(debug=True, host='0.0.0.0', port=8080)
```

○ Defines a function that returns the string "hello world".

○ Imports the Flask module and creates a new Flask application instance with the name app.

○ Defines a new route for the Flask application to handle requests to the root URL path.

○ Starts the Flask application and runs it on the host '0.0.0.0' with port 8080 in debug mode.
